

Dr. Francesco De Meo joins as Member of Advisory Board

DataVaccinator deepens expertise and network in the health sector

Luxembourg, 17 October 2023 – With immediate effect, Dr. Francesco De Meo will join the DataVaccinator Advisory Board. He will contribute his deep knowledge in healthcare ecosystems and his know-how in building successful healthcare businesses on an international scale.

“The new technologies that DataVaccinator has developed are designed to take privacy and security risks out of the data in a very efficient way”, states Dr. De Meo. “De-risking of health data is an essential task as it is the prerequisite to the sharing of data among all stakeholders, from clinics and healthcare organizations to pharma companies. Performing this task efficiently and in a replicable way makes DataVaccinator a key contributor to better and affordable healthcare.”

“We are delighted that Dr. De Meo joins our Board”, says Kurt Kammerer, CEO. “Francesco De Meo not only understands the complex healthcare market, he knows how to scale international healthcare businesses. With 15 years as a Member of Management Board Fresenius Group, he was a long standing C-Level Executive at a DAX company, in this time he built up the #1 leading European hospital group Helios with round €11.7bn Euro in revenues and round €1.1bn Euro in EBIT (2022). Needless to say that his expertise in healthcare and his access to international healthcare networks will be of great benefit to DataVaccinator.”

About DataVaccinator

DataVaccinator protects your sensitive data and information against abuse. At the very moment when data is being generated, the DataVaccinator service splits that data and uses advanced pseudonymisation techniques to separate content from identity information. Thus, the DataVaccinator service reduces cyber security risks in the health, industry, finance and other sectors and supports service providers, device manufacturers, data generating and data handling parties to manage sensitive data in a secure and GDPR-compliant manner.
