AI Data Loads "Going Global" in today's Regionalized World

Kuwait, 04 February 2026 (DCO General Assembly Meeting)

"Can AI Data Loads "Go Global" in today's regionalized world?" was one of the key questions asked at DCO GAM. DataVaccinator confirmed: "Yes, they can!" The DCO community welcomed DataVaccinator's unique solution for **AI Data Roaming** that lets regional AI Data Clearing Centers (MENA, EUROPE, USA, INDIA, LATAM, ASEAN..) connect and enable sovereign data exchange between their users.

"This winning combination of regional governance and global reach will unlock streams of AI-Ready data, thereby resolving the biggest challenge faced by AI, that of **Data Scarcity**" says Dr. Talal AlMeshal, CBO of DataVaccinator.

"**Fast Rollout** is guaranteed as DataVaccinator's patented technologies work on today's internet and web without any changes." adds Kurt Kammerer, CEO.
